Roberto Reyes Associate Civil Engineer City of Fremont, CA Development Services Center 39550 Liberty Street Fremont, CA 94537-5006

DEC 8 2000

Dear Mr. Reyes:

Please see the enclosed copies of FEMA Elevation Certificates for Tract 5329, the Wildflower Common Development. The information detailed on the enclosed certificates specify expensive flood insurance on the structures within this tract. The certificates specify that although the structures in questions are located within a Flood Zone 'B', they have a storm drain system that is directly connected to a Flood Zone 'A6'. With this connected storm drain system, the buildings are rated as having a portion of the structure within an 'A6' Flood Zone with a subgrade attached garage as the lowest floor. This rating of these structures as being within an 'A6' Flood Zone with their lowest floors a few feet below the Base Flood Elevation level has resulted in what may be unnecessary expensive flood insurance premium rates on these structures.

I'm wondering if there is a way in which we can lower the flood insurance premium rates for the owners of these homes? Please review the enclosed FEMA Elevation Certificates for Tract 5329 and the homes located within this tract. Is the storm drain system for this tract of homes connected to these buildings? If so, does this storm drain system run into an 'A6' Flood Zone? If so, can this storm drain system be disconnected from these homes in such a way as to still provide for proper storm drainage and yet permit these homes to be re-rated as being within a 'B' Flood Zone? A 'B' Flood Zone rating would bring these structures into compliance with local and NFIP building regulations and will result in a less expensive flood insurance premium for the owners of these homes.

Thank you for your assistance with this important matter.

Sincerely,

Michael Shore

Flood Program Planner
